

Characteristics

- Axial fan with welded steel casing
- Fan casing, hot dip galvanized after manufacturing
- Asynchronous 3-phased multi-voltage motor 230/400V 50Hz (if <5.5kW) or 400/690V (if >= 5.5kW)
- Impeller with glass-reinforced nylon blades
- Standard cast aluminium hub and IEC central boring, with key way

Drawing and dimensions

Special configurations

- Dimensions (fan diameter, flanges, casing length, ...) according to customer's requirements
- Stainless steel casing
- ATEX execution for zone 1/21 and/or zone 2/22
- Cast aluminium blades
- Single-phase motor (up to 2.2kW, 2 and 4 poles)
- Hydraulic motor
- Special executions on demand

Motor, noise and ErP data according to EU 327/2011

- Axial fan with welded steel casing
- Fan casing, hot dip galvanized after manufacturing
- Asynchronous 3-phased multi-voltage motor 230/400V 50Hz (if <5.5kW) or 400/690V (if ≥ 5.5kW)
- Impeller with glass-reinforced nylon blades
- Standard cast aluminium hub and IEC central boring, with key way

Drawing and dimensions

Special configurations

- Dimensions (fan diameter, flanges, casing length, ...) according to customer's requirements
- Stainless steel casing
- ATEX execution for zone 1/21 and/or zone 2/22
- Cast aluminium blades
- Single-phase motor (up to 2.2kW, 2 and 4 poles)
- Hydraulic motor
- Special executions on demand

N-P: number of blades - available positions

LM: indicative

eff_o: efficiency on optimal point (aerolic efficiency x motor efficiency)

All data concerning efficiency is given for working without frequency inverter and based on installation mode A - Static

V_{opt}: Volume flow on optimal point

P_{opt}: Pressure on optimal point

The specific ratio for all fans is ~1,00

P_{in}: Electrical active power at max. efficiency working point

In case of empty cells: ErP non applicable if power < 125W

Curves

Static pressure (p) [Pa]

Characteristics

- Axial fan with welded steel casing
- Fan casing, hot dip galvanized after manufacturing
- Asynchronous 3-phased multi-voltage motor 230/400V 50Hz (if <5.5kW) or 400/690V (if ≥ 5.5kW)
- Impeller with glass-reinforced nylon blades
- Standard cast aluminium hub and IEC central boring, with key way

Drawing and dimensions

Special configurations

- Dimensions (fan diameter, flanges, casing length, ...) according to customer's requirements
- Stainless steel casing
- ATEX execution for zone 1/21 and/or zone 2/22
- Cast aluminium blades
- Hydraulic motor
- Special executions on demand

Motor, noise and ErP data according to EU 327/2011

- Design in accordance with the ISO 13857 norm

Type	Item	ϕD	ϕE	$n \times \phi g$	P
XRT 315	C1.000.114	400	357	4 x $\phi 12$	90
XRT 355	C1.000.115	315	396	4 x $\phi 12$	90
XRT 400	C1.000.116	400	438	4 x $\phi 12$	110
XRT 450	C1.000.117	450	488	4 x $\phi 12$	130
XRT 500	C1.000.118	500	536	4 x $\phi 12$	130
XRT 560	C1.000.119	560	608	4 x $\phi 12$	180
XRT 630	C1.000.120	630	682	4 x $\phi 12$	200
XRT 710	C1.000.121	710	760	4 x $\phi 14$	200
XRT 800	C1.000.122	800	842	4 x $\phi 14$	200
XRT 900	C1.000.123	900	935	4 x $\phi 14$	250
XRT 1000	C1.000.124	1000	1051	8 x $\phi 14$	250
XRT 1120	C1.000.125	1120	1176	8 x $\phi 14$	300
XRT 1250	C1.000.126	1250	1311	8 x $\phi 14$	300

XRV - Flat wire guard

- Flat wire guard
- ADK / AVK: impeller side assembly
- Material: stainless steel
- Design in accordance with the ISO 13857 norm
